

EASY PRESS

Tools for the improvement of active rehabilitation

EASY PRESS

- TOTAL WEIGHT 110 kg
- LENGTH 140 cm
- WIDTH 85 cm
- HEIGHT 206 cm
- WEIGHT STACK 50 kg
- optional 75 kg

Complies to CE-MDD regulations Class 1 (with measurement function).

Easy excess, low artogenic impact and maximal adaptation of muscle load are the key features of the Monitored Rehab Systems Easy Press. The Easy Press is ideally suited for the elderly patient. The Easy Press offers the unique possibility of single- or double-sided training, assisted by the revolutionary MRS Software for visual feedback. From early on vulnerable, low-impact patients to more resilient patients the Easy Press is perfect to use. All kinds of patients with loss of functional activity due to orthopedic, musculoskeletal or neurological origin can be supported by the Easy Press.

ISOMETRIC GATE

A dynamic test with a isometric 'hold', this exercise guides patients as they maneuver the red ball between the gaps in the bars.

CONTROLLED ROUTE

Concentric and eccentric movements shift the circle up and down, activating muscle control and invigorating coordinate abilities.

MOTOR CONTROLE

Eccentric and Concentric exercise settings allows clinician to control speeds both concentrically and eccentrically affecting motor control and joint stability.

MATHEMATICS DUAL TASKS

The Dual Tasking option incorporates math problems and movement of various muscle groups to complete a task.

SKI GAME

Full 'Super G' downhill. A very challenging exercise.
